METAL DETECTOR TRAINING & PERFORMANCE AUDITS

TRAINING: OVERALL METAL DETECTION PROGRAM

Emphasis is given for development of an overall metal detection program.

Effectively removing metal contamination involves more than just properly installing and adjusting a metal detector. Developing effective working practices by line operators, maintenance and Q.A. personnel is important.

Recommendations and training are provided in the following areas:

- Frequency and methods of testing.
- What to do with rejected product.
- Recording/documentation maintenance.
- How metal contamination can reach the customer even when a metal detector is in place.
- False rejects, why they occur and how to minimize them.

METAL DETECTOR AUDITING

Confirm each metal detector for proper set up, detection and accurate rejection performance.

The inspection also covers the following:

- Functionality of metal detector's reject mechanism.
- Conveyor belting, sensors and peripheral devices.
- Product set-up advice.
- Maintenance and testing procedure advice.

Florida Processing and Packaging Equipment

RATES

Equipment Audits are available at the following rates:

Performance Verification Rate:

A minimum of \$600.00 will be billed per audit visit, up to an initial four hour of Service. Additional labor above the minimum service rate of \$600.00 will be billed at \$100.00 per hour for regular hours (8:00 – 5:00). Saturday and non-regular hours will be the hourly rate x 1.5.
